FOREWORD

Our 10th ANNIVERSARY PUBLIC SALE at the WALDORF! We are very proud of our accomplishments in conducting America's finest top quality auctions in the setting of a truly great landmark — the famous WALDORF-ASTORIA HOTEL in New York City. This past decade has seen our profession rise to new heights and we look forward to serving numismatics for many years to come. The increased demand for quality coins will result in greater competition for the steadily dwindling supply. We wish to thank all of our collector and dealer friends for helping us make these past ten years so memorable.

Our ANNIVERSARY CATALOGUE represents many months of careful preparation and consists of outstanding consignments from Estates as well as collectors. The excitement of a Public Sale of this magnitude is truly difficult to describe. If you can possibly attend this sale in person, we urge you to do so. For those of you who cannot attend, we will again handle your mail bids as if you were there in person.

We know that the successful purchasers in this outstanding sale will be well pleased and for the first time we can offer more than one great rarity of the same date to select from . . . such as the pair of 1796 and 1808 Quarter Eagles.

With the current trend of record prices being established for quality, many of the rarities in this sale will sell at above our estimates. Numismatic history will be made again this year with the sale of the **UNIQUE STOCKTON N.G.N. \$5 GOLD**; **THE DATED 1830 \$10 TEMPLETON REID**; the **RARE 1838-O HALF DOLLAR**; **1827 QUARTER** and other rarities such as the **1875 \$3 GOLD**; **1870-S DOLLAR**; the **TRANSITIONAL DIME OF 1859**, and many hundreds of other classics.

The quality of the foreign and ancient coins is again of the finest and in all series you will find choice coins you will want to add to your collection. We urge you to bid realistically for these rarities so you will have no regrets when the sale is concluded.

GOLD ANTIQUITIES

Excavated antiquities from ancient Rome, Greece, and Egypt has stopped coming through in recent years, due to rigorous government controls. Only Iran, formerly called Persia, is now a source of artifacts, from the huge grave areas discovered in the western and northern regions.

The following gold animals are of Amlash origin believed to date to the ninth-eighth centuries B.C. They were accidentally discovered by peasants in the mountainous region southwest of the Caspian Sea. In this small Iranian community of farmers and stock-breeders, potter and modeller were one and the same artist, an artist gifted with inventive powers of a very high order. Their most favored object is the rhyton, which is given the form of animals familiar to the artist, such as the horse, cow, stag, goat. The metal workers produced a great variety of small animal figures which the humped ox and stag predominate, along with the effigies of the wild boar and the unicorn.

Though in the Amlash phase, clay remained the basic medium of artistic expression, progress was now being made in the craft of metal working.

The so-called Amlash culture has been enriched and extended by recent discoveries made at Marlik, by the Iranian Expedition sponsored by the Teheran Museum. The tombs at Marlik yielded gold, silver, bronze objects and a great many terra cotta statuettes. The dating was confirmed by the discovery, made by peasants, of two horses blinkers, in bronze, inscribed in cuneiform characters with the names of King Meuas (810-781 B.C.) and King Argistis (781-760 B.C.). Although certain Amlash figures recently have been cleverly imitated from gold of the period and, therefore, have confused the authentication of the genuine ones, these 5 objects have been consigned by World Antiquities, Inc. and are fully guaranteed by them.

PRIVATE OR TERRITORIAL GOLD COINS

TEMPLETON-REID

Lot No. 601

TEMPLETON REID — ASSAYER OF GOLD

LUMPKIN COUNTY — GEORGIA 1830

\$10 1830 DATED

- 601 Templeton Reid was the first person to issue private gold coins in the United States and his few coins rank amongst the rarest of all private issues. Last May, in our sale at the Waldorf, we were privileged to sell the \$10 1830 Undated, a Brilliant Uncirculated specimen with proof lustre, for the record price of \$29,000. This coin was one of the highlights of the 1966 season and now another great rarity of this series . . . the dated variety is offered to the collectors who appreciate the finest and can afford the rarest. Mr. Reid operated a private mint near the gold mines of Lumpkin County, Georgia. He struck coins in denominations of \$2.50, \$5.00 and \$10.00 and because his coins were of a higher grade than any other gold coins ever issued in this country, virtually all the coins he struck were melted down and the few pieces remaining in the hands of collectors and museums are the most sought after of all Territorial Gold coins. As you can see from the above photo, this specimen is in Very Good condition. Obverse, 1830 center, GEORGIA above, and GOLD below. Some of the beading is indistinct and from being carried as a pocket piece heavy wear is noticeable at date. Reverse, on two lines in center TEN DOLLARS, legend above TEMPLETON REID and ASSAYER below. Some letters dim. This specimen is of the highest rarity and in all probabilities this will be the only opportunity you will have to acquire this rarity. This coin should realize in excess of (10,000.00)

At the top of the border, CALIFORNIA GOLD, and below are the words WITHOUT ALLOY. Reverse, a circle of 16 stars, inside of which and at the top are the N.G.&N.; and in a curved line at the bottom, also within the circle STOCKTON. In the center, on a straight line is the date 1850. Outside the circle and around the border, at the top, FULL WEIGHT OF, below around the border, HALF EAGLE. Plain edge. This unique rarity was purchased in Stockton in 1958 by the foremost San Francisco coin dealer, the late Earl Parker. No records exist mentioning this specimen because in the early '50's — about 1855, the entire town of Stockton was destroyed by fire.

As you can note from the above photo, below HA on rim there is a tiny edge knock. On reverse, the numeral 5 on shield is dim. Evidence of repair and retooling at Y in ALLOY. The overall appearance of this coin is Fine with surface handling marks.

In our opinion, this unique coin should realize and is worth (25,000.00)

FRACTIONAL CURRENCY SHIELD

AN EXTREMELY RARE FRACTIONAL CURRENCY SHIELD WITH PINK BACKGROUND

- 1798 Superbly mounted in a spectacular gold and black frame with non-glare glass. One of the very few complete Fractional Currency shields with the pink background. Friedberg catalogue number 1383. The Treasury Department produced these shields for sales to banks so that they might detect counterfeit notes by comparison with the genuine notes on the shield. They were made in Washington during the years 1866 and 1867. The outside dimensions of the shield are 20 X 25 and on the shield are mounted 39 specimens of Fractional Currency. Each note was printed on one side only, so that obverse and reverse appear as separate notes. The familiar shields with the gray background appear quite frequently, however, to the best of our knowledge this is one of the few times a pink background shield has been offered for sale at auction or privately. The ratio of rarity surely is 100 to 1 and we doubt if there are more than a dozen pink background shields still in existence. Having been stored in a damp depository many years ago most shields show stains and faults. This, as you will note from the above plate shows circular stain at top in semi-circle and there is a crease at top through center of 5th star and eagle, also creased on left margin. These faults are very minor. With the gray background Fractional Currency shields selling today for over \$600.00 in nice condition, this great rarity is certainly worth and should realize (3000.00)
-

THE COMPLETE SET OF U.S. COMMEMORATIVE HALF DOLLARS

- 1799 A superb set of 144 pieces which includes the Isabella Quarter and the Lafayette Dollar. Each and every commemorative piece from the initial Columbian Exposition to the last of the Washington-Carver issues has been carefully selected and this set is the equal to the very best. Some natural toning is evident on a majority of the coins. Mounted in five custom designed plastic cases. A set of this calibre should realize (5500.00)

We copy herewith an article which Mr. Willem sent to Spink in recent circular, throwing light on the single piece. A double must be unique. E. F./Unc., etc. (\$1000.-1500.)

In your September issue you feature a short story by Thomas Lismore, "The Coinage of Cuba." Mr. Lismore generously refers to me and to my work on The United States Trade Dollar, and my purchase of a specimen 1870 Provisional Silver Peso not previously reported in the Cuban series.

Mr. Lismore describes this specimen as carrying on the left of the date the letter "E" instead of the usual "P."

This is incorrect. Above the date is the traditional knotted and bowed wreath. Above the knotted wreath, all other specimens of the 1870 Provisional Coinage of all denominations known to exist have a single star in the open field midway below the word PESO. The specimen I have has the block letter "E" in the position otherwise occupied by the star.

The authority on the 1870 Provisional issue, Roberto Pesant, confirms Mr. Lismore's long held belief that complete sets in silver were struck of the 1870 Provisional coins and concludes that not more than a dozen sets were struck in silver to serve as presentation pieces, but believes that only three or four silver sets were able to be sent to Cuba.

"The Peso with the 'E' of ENSAYO (ESSAI)," Mr. Pesant writes, "corresponds to a Trial Piece, and being to this moment unknown, thus constitutes an extraordinary rarity."

Yours very truly,
JOHN M. WILLEM

CHINA

(Coins described as per new reprint of Kann)

The new Kann valuations are low for imperial coins, high for certain republican and also high for patterns. However, these are the prices as quoted in the Orient and all Chinese coins will eventually sell for these prices. Certain coins sell for above these prices already, particularly if better than V. F. Kann prices are for V. F.

(A set in a London sale recently was purchased by a dealer for \$75 plus commissions. We never sold an unc. set in our many Chinese sales. Oka in his "Silver Crowns of Far East" has the ASTC in VF \$166 U. S. p. 36.3.)

- 2016A **Kiang Nan** (pronounce Ka-anein) Dragon Dollar 1897 with large letters. Kann 66 (\$80). Unc. (rare as such). Oka p. 47.1 lists for unc. \$111. (\$75.-100.)
- 2017 Copper pattern of dollar 1904 Hah-Ch/'G' of Kiang and 'P' of Province missing. Not as Kann 99 and not listed. Patterns are quoted very high in new prices but this coin unlisted. **PHOTO** (Oka would value \$1000!) (\$250.-350.)
-
- 2018 **Chekiang Province.** The rarity of the series! Dragon Dollar 1902. Different from Kann 119 (\$1500) as the second Chinese character from the left on top has unbroken line instead of broken line, the Manchu characters are larger, the rim is different, the rosettes are also different from 119(I). We may believe this is a third die. It is impossible to presume that this coin is not authentic. In 1935 when Tsiang wrote one of his books with valuations, this coin was valued \$20 Chinese = \$6 US and it certainly would not have paid counterfeiters to make a die for a \$6 coin. Woodward owned this coin before 1935 and it has not been out of our traces ever since. We therefore fully guarantee same. **PHOTO** (\$1500.-1750.)
-

2185 The "Unknown" (!) 1953 proof set. 6 pcs. 1/2d, 1d, 3d, 6d, 1sh, 2sh. One of the most exciting sets of the Australian series. We quote from Vernon Brown's article in the April 1965 "Numismatist". (\$500.-750.)

Early in 1953 I wrote to the Commonwealth Bank of Australia, Sydney, in regard to obtaining proof or specimen coins which might be issued with the portrait of Queen Elizabeth II after she was crowned in June of that year. This bank advised me in April, 1953 "that the Deputy Master of the Royal Mint,bourne, has agreed to make ten sets of specimen Elizabeth II coins available for your museum in due course." The ten specimen sets were delivered comprising all denominations with the exception of the halfpenny which was not struck at that mint. On the 29th of January, 1954 the Commonwealth Bank wrote again and in this letter stated that the Royal mint Perth had supplied them with 10 proof specimens of the Australian halfpence.
